---	---

Observation Building Area refers **only** to the **lawn area** adjacent to the observation building and the sea wall. The building itself **is not part of the permit area and may not be used for the set up of any articles (chairs, tables, etc.) inside the structure at any time during your event**. The building may not be used for your event or any ceremony. Attendees of the event are welcome to go inside the building and use it for viewing the scenery and the interpretive exhibits inside.

The **Garden House** is the only facility that is not open to the public during park hours (when your event takes place). It has “period type” display furniture, **which may not be moved**. This limits the useable floor space available in the Garden House to approximately 500 sq. ft. on the ground floor. The upper floor has very limited capacity and floor space.

We require that the chairs used in our package and site areas minimize compaction of the lawn areas. This will help keep the grass from being damaged at the root area. We do not provide chairs or tables for your event, but understand there are rental companies that have these items available. Call if questions.

There is a restroom located off the Garden House back porch with a sink and toilet. This is only opened for events that reserve the Garden House. The Garden House also has a 60 sq. ft. kitchen featuring a residential size stove, refrigerator, microwave, sink and a serving counter.
