**The Garden House** is the only facility that is not open to the public during park hours (when your event takes place). It has display furniture, **which cannot be moved**. This limits the useable floor space available in the Garden House to approximately 500 sq. ft. on the ground floor. The upper floor has very limited capacity and floor space. Approved chairs and tables are allowed in the grass area outside the Garden House and on the south side of the Pavilion.

Electricity and potable water are available There is a restroom located off the Garden House back porch with a sink and toilet. This is only opened for events that reserve the Garden House. The Garden House also has a 60 ft<sup>2</sup> kitchen equipped with a residential size stove, refrigerator, microwave, sink and a serving counter.

**Observation Building Lawn** refers only to the area adjacent to the observation building and the sea wall. The building itself **is not part of the permit area and may not be used for the set-up of any articles (chairs, tables, etc.) inside the structure at any time during your event**. The building may not be used for your event or any ceremony. Attendees of the event are welcome to go inside the building and for viewing the scenery and the interpretive exhibits inside.

We require that the chairs used in the garden house and pavilion site areas minimize compaction of the lawn. This will help keep the grass from being damaged at the root area. We do not provide chairs or tables. For your event, there are local rental companies that have these items available.
